Bio-Cinn NF-220

Interlube's Bio-Cinn NF-220 is a multi-viscosity, multi-purpose, biodegradable lubricant, designed for heavy duty industrial applications requiring an ISO 220 viscosity grade. Its inherently superior thermal and oxidation stability, coupled with outstanding anti-oxidants, EP, and anti-wear agents, far exceeds the capabilities of conventional lubricants. It also has a very high viscosity index and low pour point allowing for its use over a wide range of temperatures.

This product is especially designed for heavy duty industrial applications operating in environmentally sensitive areas. It has outstanding thermal properties, as well as superior anti-wear and rust & oxidation resistance

- *Extremely High Flash & Fire Points
- *Outstanding Thermal Properties
- *Excellent Oxidation Stability
- *Low Volatility
- *High Viscosity Index
- *Anti-Wear & EP Performance
- *Completely Shear Stable
- *Wide Operating Temperature Range
- *Environmentally Friendly
- *Readily Biodegradable Formulation

Typical Properties

Biodegradability, OECD 301B	84%
Density, lbs. /gallon	8.3
Viscosity, SUS @ 100°F	1100
SUS @ 210°F	150
Viscosity Index	170
Flash Point, °F	>500
Pour Point, °F	+5
