
Endura Air Tool Oils

Overview: Interlube Endura Air Tool Oils are designed to maintain the original optimum performance of your air tools at all times. They do this through a unique combination of special base oils and additive treatments which virtually eliminate the normal rusting, gumming, and wear problems.

Through continued use, you will realize reduced maintenance costs, longer equipment life, reduced oil consumption, reduced downtime, and improved productivity.

Operational Benefits: These products offer these competitive advantages to enhance your reliability:

- **Excellent detergency and cleaning action** • **Emulsifies entrained moisture from the compressed air** • **Strong Anti-Wear protection for longer air tool life** • **Tenacious metallic adherence** • **Engineered rust and corrosion protection** • **Extremely strong oxidation resistance**

Application: For use in airline oilers used with lubricated air tools.

Typical Industries: This product is commonly used (but not exclusively) in the following industries:

- **General manufacturing** • **Specialty manufacturing**
