## FORMULA 2610 CLEANER CONCENTRATE

This product is a very versatile multi purpose liquid concentrate specially formulated for hard surface cleaning. It contains no severely harsh or hazardous chemicals, yet gives heavy duty cleaning performance. It has the ability to penetrate the toughest soils, displace them from the surface, emulsify them and keep them from redepositing. It has excellent wetting and sheeting action and no streak rinsing to give that clean sparkling appearance desired. It cleans and rinses so well that a shine is all that's left on the surface.

Due to it's unique concentrated multi purpose formulation and easy to use liquid form, it's use level can be adjusted to suit the task, from high levels for the toughest grit, grease, and grime to very low levels for most cleaning operations to give the optimum economy of use.

### TYPICAL PROPERTIES
