Synthetic Refrigeration Compressor Oil 150 **Synthetic Refrigeration Compressor Oil 300**

Interlube's Synthetic Refrigeration Compressor Oils 150 and 300 are totally synthetic refrigeration fluids designed to replace mineral oil based refrigeration oils in compressors using ammonia, R-12, R-22 and R114. Because of their totally synthetic nature they have no wax content and no real flock point. They are specially designed for industrial and marine use and are more chemically and thermally stable than their mineral oil counterparts. This added stability means less sludge and acid formation, which is a significant advantage for these products.

- Synthetic Hydrocarbon Base
- Replace Mineral Oils
- Higher Thermal Stability
- Higher Chemical Stability
- No Wax
- Very Low Pour point
- No True Flock Point
