MOLY CHAIN & CABLE LUBE NON DRIP

Compounded with the highest quality base oils and additives. This dark gray lubricant has strong attraction to metals, assuring excellent lubrication of chains, sprockets, cables, & wire rope.

Moly Chain & Cable Lube Non Drip penetrates the rollers, pins, links, and bushings of chains, leaving a lubricating film, and thus reducing friction, wear and corrosion.

When applied to wire ropes and cables, this product will not only penetrate to the core, but the moly and the other additives will plate the strands and provide anti-wear and rust protection.

REALIZE THE FOLLOWING BENEFITS:

- *Moly plates out on parts and prevents metal to metal contact.
- *Polymers make lubricant cling to chains, rollers, and cables. Retards dripping.
- *Extreme Pressure additive protect from overloads and shock loads.
- *Special additive assure penetration to the innermost parts of chains, pins, cables, and wire rope.
- *Rust and corrosion inhibitors protect the metal parts from water & moisture.
- *Oxidation inhibitor retards chemical change of the lubricant.
- *Viscosity: SAE 10W-40

Moly Chain & Cable Lube Non Drip increases equipment life, reduces maintenance costs by reducing down time, lower power consumption, plus other benefits outlined above.

Most Common Applications: Material handling equipment, road and construction machinery, marine, railroad, mining, aircraft field handling, chain saws, cutter bars, conveyors, hoist chains, link and roller assemblies.

Interlube manufactures a wide variety of chain lubricants, both mineral and synthetic based. Please call for a specific recommendation.
